

ENVIRONMENTS WHERE THE SERVO MOTOR IS USED.

- Sub sea and Oil & Gas -servo motors are exposed to high pressure, high temperature and may have explosion proof requirements for this environment. For example Kenya Pipeline Company.
- Printing press-servo motors are used in printing industries because of their accuracy and high speed. For example Kartasi Industries
- Conveyor and handling systems-many companies use the servo motors because of their high speed and accuracy and the fact that they have a force that causes rotation. For example The CocaCola Company
